

Rotafilo manufactures tooling for various types of aircrafts.

Tools are made from up-to-date drawings, correct material and coating process, and proper testing.

We produce thousands of tools annually in order to support the needs of the MRO's and airlines.

- Repair jigs and fixtures
- Spanners, wrenches
- Retainers
- Adapters, pins
- Removal/installation equipment
- Bench tools
- Lift cranes and support structures
- Maintenance stands
- Wheel and brake removal and handling
- Lifting fixtures
- Pullers
- Socket
- Slide tools
- Landing gear handling and maintenance
- APU, stands, slings, straps, adapters
- Electrical test equipment and others

- ✈ Great expertise in maintenance tooling of aircrafts, engines, components.
- ✈ Electronic, mechanic, pneumatic, hydraulic toolings are produced. Sizes from a wrench tool to a repair tower.
- ✈ Lower price tags with higher quality.
- ✈ Shortest lead times.
- ✈ Broad range of capabilities to assist our customers with their needs. Welding and inspection operations comply with AWS D1.1 / D1.1M.
- ✈ Calibration, inspection and test services provided.
- ✈ Life time overhaul service and spare parts supply are guaranteed.

## Rotafilo design tools

Rotafilo offers certified alternatives to high price OEM tools and equipment. Our personnel is highly experienced in constructing MRO tooling.

Rotafilo Tools and Test Equipments (TTE) are cost effective, high quality and safe.

We follow the guidelines by ARINC Report 668 to fulfill every requirement detailed in FAA 8900.1, FAA 145.109 and EASA 134.40.

Rotafilo designs and manufactures TTE according to the requirements of Component Maintenance Manuals (CMM) and Aircraft Maintenance Manuals (AMM).

Following the design stage, we generate the proper documentation that will be used in manufacturing. It will be a manual prepared according to ARINC Report 625, ATA Spec 100 and 101. This manual is delivered with the tooling/test equipment and the "Certificate of Equivalence" prepared per ARINC Report 668. If needed, user manual is also delivered with the shipment.

Rotafilo tools and test equipment are quality built and surpass MRO organizations and airlines highest standards for performance, suitability, functionality and durability. Our products help customers maximizing their productivity on the job.

Rotafilo equivalency process assures that produced TTE's are fully traceable and comply with the designated criteria in the AMM/CMM.

- ➔ Rotafilo provides full service for all your tooling needs.
- ➔ Thousands of tools are manufactured according to the latest drawings.

For each tool, we keep records including Drawing, CMM/AMM, TTE Equivalency Determination Checklist, Material Certs, Inspection Recording Sheets, Test Reports, Certificate of Equivalency.

**Response Solution within 24 hours for your critical AOG requests.**
